EXPERIENCE

CarGurus - Boston, MA

May 2026 - Present

Software Engineer I

- Developed and deployed scalable code across iOS and Android platforms via React Native, optimizing application performance and ensuring a seamless, unified user experience.

Northeastern University - Boston, MA

October 2025 - May 2026 (8 months)

Student-Administrator Partnership Fellow

- Enabled the Office of the Registrar to address 10+ previously unanswerable strategic scheduling questions by designing and developing an analytics dashboard using Python and ML models that analyzed 25,000+ enrollment records across 17 terms; presented insights directly to university provosts.
- Unlocked university-wide curriculum planning and transfer credit evaluation by identifying prerequisite bottlenecks across 8,000+ courses using network analysis (betweenness centrality) and NLP clustering.

MITRE - Bedford, MA

June 2024 - December 2025 (1 year 5 months)

Software Development Engineer Intern

- Reduced documentation search and creation time by over 50% by developing AI-powered features for a government Confluence portal using LLMs, JavaScript, and HTML to automate information retrieval and generate dynamic content.
- Centralized analysis of thousands of Excel-based Army acquisition test records by designing and developing an analytics dashboard using Python and SQL.

CarGurus - Cambridge, MA

January - June 2023, January - May 2024 (11 months)

Software Development Engineer Co-op

- Launched Top Dealer Offers on time in under a quarter to 18 metro areas with an NPS of 86 by developing dealer offer generation and configuration microservices using Java, Spring, and MySQL.
- Improved CSAT to above 80% and transaction quality by redesigning the Instant Max Cash Offer Admin Panel using React and Java, used daily by support teams to manage thousands of online transactions.
- Streamlined dealer offers management with searchable detail views and real-time information tracking for the Generated Offers Admin Dashboard using React, TypeScript, and MySQL.

STR - Woburn, MA

July - August 2023 (2 months)

Frontend Developer Intern

- Expanded non-kinetic effects support from 0 to 6 by designing and developing the new frontend for a government combat simulation project using React and Storybook.

EDUCATION

Northeastern University - Boston, MA

May 2025 - May 2026

Candidate for Master of Science in Computer Science

GPA 4.0/4.0

Northeastern University - Boston, MA

September 2021 - May 2025

Bachelor of Science in Computer Science and Design (combined major)

GPA 3.94/4.0, Dean's List all semesters

KNOWLEDGE

React, JavaScript, TypeScript, HTML/JSX/TSX, CSS, Testing Library, Storybook, Java, Spring, JUnit, Python, SQL/MySQL, Swift
Other: Figma, Photoshop, Illustrator, InDesign, Portuguese (Native proficiency), Active Security Clearance
